

# WANT TO BECOME A SOFTWARE DEVELOPER?

Join our  
Internship Bootcamp

**KRS**  
KHANYISA REAL SYSTEMS  
*Software Since '87*

## What sets it apart?

Our internship is designed to take people with a flair for software development, and bridge what they learned at college or university with what the commercial world needs.

Upon completion of the programme, successful Interns will be assisted to find employment within KRS or one of the many companies who provide interview opportunities to our graduates.

## The Details

**When:** The course runs from mid-January to early March each year.

**What it includes:** We pay a stipend of R1000 per week, and supply full cooked lunches each day.

The programme is facilitated by a team of senior developers, trainers and architects who provide you with weekly feedback on your progress.

Our projects are run according to Agile principles, so you will learn about Scrum, Extreme Programming, Test-driven development (TDD), Databases, Domain driven design (DDD), Single-page Web Apps (SPAs), JavaScript and much more.

The programme is full-time and interns are expected to work a full day, five days a week.

All interns obtain a Certificate of Attendance at the end of the internship.

**Where:** The course is run at the KRS House in Rondebosch, Cape Town, South Africa.

## What are the requirements?

Applicants must:

- Have a strong passion for coding
- Be in possession of a Matric Qualification and a completed IT-related Degree, Diploma or Certificate from a recognized Institute with an above-average academic record
- Have programming experience in C# or Java
- Be able to work independently and within a team
- Reside in Cape Town for the duration of the course at their own expense
- Be South African citizens or have a valid South African work permit
- Preference will be given to EE/AA candidates
